

Dimmer Brand	Type	Dimmer Family	Model Number
Lutron	Triac (Leading Edge)	Diva	DVCL-153PR-WH-C
		Skylark	SCL-153PR-WH-C
		Skylark Contour	CTCL-153PDH-WH-C
		Maestro	MACL-153MH
		Toggler	TGCL-153PH

Lutron	ELV/MLV (Trailing Edge)	Diva	DVELV-303P-WH
		Nova	NLV-600-WH
		Maestro	MAELV-600-WH
		Skylark	SELVB-300PR-WH-C

Leviton	Triac (Leading Edge)	SureSlide	NO.6672
		Decora SureSlide	NO.6674
		Toggle Touch	TGI10
		Toggle Touch	TGM10
		Trimatron	NO.6683

Leviton	ELV/MLV (Trailing Edge)	Decora	DSE06-10Z
		Vizia +	VPE06-1LZ
		Illumatech	IPE04-1LZ

TRIAC dimming is a form of phase-cut dimming used to regulate the brightness of incandescent, halogen, and certain types of LED lighting. TRIAC dimming systems are straightforward to install and operate, requiring no specialized wiring. Consult a Qualified Liscened Electrician.

ELV dimmers are electronic low-voltage dimmers that are designed to work with light fixtures that use electronic transformers. ELV dimmers use pulse-width modulation to control the power delivered to the light fixture resulting in a smoother and more precise dimming experience. ELV dimmers require a neutral wire and may not be compatible with certain types of switch boxes. Consult a Qualified Liscened Electrician.
